## **Mach-Aire launch their new Sterility Test Isolator at the Interphex Asia Exhibition**

Mach-Aire, the Bolton based designer and manufacturer of Fume Cupboards, Clean Rooms and dust containment Isolators and Downflow Booths, recently exhibited at Interphex Asia 2010, held in Singapore in early June.

This exhibition is the showcase for the latest technologies and expertise in pharmaceutical manufacturing in Asia, and attracts visitors from over 20 countries.

Linking in with their Singapore agent, Anachem Technologies PTE., Mach-Aire took the opportunity to exhibit their newly designed Sterility Test Isolator. Incorporating a host of new features, the Isolator is designed to operate with the VHP gassing system of the customer's choice, and is one of a new generation of pharmaceutical Isolators designed by the company.

Leo Yeow Lai Yew, Mach-Aires agent said "The exhibition was a tremendous success with sales leads being generated not only from potential customers in Singapore, but in many of the neighbouring countries. Mach-Aires decision to exhibit their new Isolator paid off with many excellent comments on the quality of the product, which I'm sure will help us to secure future orders".
